SKILLS

Frontend & Core

Webflow React
TypeScript Next.js
Tailwind CSS
HTML5 / CSS3
Accessibility

Engineering & Architecture

Component Architecture
Design Systems Vitest
REST APIs Node.js Git

UI & Tooling

Figma to Code
GSAP / Motion
Chrome DevTools
Performance Tuning

WEBSITES I DEVELOPED

t'works

Global language services corporate site with multi-language CMS and structured content architecture.

DirectorZen

B2B platform built on Memberstack with authentication, member-gated content, and dynamic member accounts.

PERSONAL PROJECTS

comparador Public

Next.js and TypeScript app comparing real-time grocery prices across retailers, with Vitest-tested parsers, debounced search, autocomplete, and dark responsive UI.

● TypeScript ● React

book-buddy Public

React and TypeScript app integrating the Open Library API with LLM-assisted search for contextual book discovery. Strictly typed with Vitest test coverage.

● React ● TypeScript

Frontend developer with 3+ years of experience shipping production, accessible websites, from Figma-to-code and Webflow builds to reusable component and design-token systems. Now building with React, TypeScript, and Next.js, with Vitest-tested personal projects. Easy to collaborate with, reliable on deadlines, and quick to ask the right questions early rather than guess.

EXPERIENCE

Frontend Developer

Aug 2023 - Present

Better Mistakes · Remote

- Architected and shipped production web interfaces across 15+ client projects, translating complex Figma designs into responsive, accessible, and high-performance code.
- Built reusable component libraries and design-token systems, standardizing UI patterns.
- Developed custom JavaScript and GSAP interactive features (scroll-driven animations, dynamic filtering, CMS integration), extending web platform capabilities with code.
- Collaborated with designers and product stakeholders to identify UI edge cases, responsive constraints, and accessibility requirements before implementation.
- Conducted performance audits and cross-browser QA, improving Core Web Vitals scores (e.g. LCP/CLS) across client sites.
- Maintained live production sites for post-launch clients: bug triage, defect diagnosis, and continuous improvement requests.

Freelance Frontend Developer

2023 - 2025

Self-employed · Upwork (part-time, alongside full-time role at Better Mistakes) · Remote

- Maintained 100% Job Success Score and 5.0 rating across 9 client engagements by delivering clean frontend builds and robust QA.
- Owned end-to-end frontend delivery from scoping and technical design to coding, testing, and client handoff.

Frontend Developer - Internship

Nov 2022 - Aug 2023

Better Mistakes · Lisbon, Portugal

- Promoted to full-time developer in under 9 months after demonstrating strong frontend fundamentals, component structure, and Git workflow execution.

Social Media Designer

Sep 2020 - Jul 2022

Bright Lisbon Agency · Part-time · Lisbon, Portugal

- Designed digital assets and motion graphics, developing visual hierarchy and layout fundamentals applied to modern UI engineering.

EDUCATION

B.A. Audiovisual & Multimedia

Sep 2019 - Jul 2022

Escola Superior de Comunicação Social
